COREP est fabricant et CRÉATEUR de Luminaires en France, depuis 1970 à Bègles en Gironde.

COREP développe des gammes inspirées des dernières tendances, des nouveaux usages et des besoins de ses différents marchés.

À ce titre, son équipe de designers met au point des collections spécifiques chaque année. Afin de protéger et pérenniser ce savoir-faire, COREP dépose ses catalogues et ses modèles pour mieux garantir l'originalité des produits proposés. COREP se réserve ainsi le droit d'utiliser ces outils et son antériorité à des fins légales pour toujours mieux satisfaire ses clients et leur assurer la primeur et la différence de ses gammes.

COREP souhaite illustrer plus que jamais son statut de créateur de Lumières.

*COREP is a manufacturer and designer of decorative lights in France, since 1970, in Bègles in Gironde.*

*COREP has been developing ranges inspired from last trends, new uses and needs for different markets.*

*As such, its team of designers develops specific collections each year. To protect and perpetuate this know-how, COREP registers its catalogues and its models to assure the originality of its products. COREP reserves the right to use those means and its anteriority to legal purposes, in order to even better satisfy its customers and to guarantee them scoops and differences in its ranges.*

*COREP wishes to materialize more than ever its status of designer of Lights.*

50 ans déjà !

En 1970 Corep crée à Bordeaux un petit atelier de production d'abat-jour et de suspensions.

Cette entreprise artisanale est devenue en 50 ans le N°1 en France du luminaire décoratif.

Quel chemin parcouru... Si la fonction première du luminaire est l'éclairage, il n'en demeure pas moins qu'il joue un rôle fonctionnel et également esthétique.

Nous avons toujours privilégié la créativité, clé de voûte de nos collections alimentée par notre savoir-faire.

Notre état d'esprit depuis ces nombreuses années est toujours intact, l'enthousiasme et la passion font partie de l'ADN de nos équipes.

Nous portons fièrement l'héritage de ces 50 années. Il nous permet plus que jamais d'envisager l'avenir avec la même détermination.

Alain PETIT

*50 years already!*

*In 1970, Corep sets up a small workshop in Bordeaux for the production of lampshades and pendant lights.*

*In 50 years, this artisanal company has become the N°1 decorative lighting company in France.*

*It has been quite a journey... Although the primary function of a luminaire is to provide lighting, it plays both a functional and an aesthetic role.*

*We have always favoured creativity, the keystone of our collections, fuelled by our know-how.*

*Our state of mind over these many years is still intact, enthusiasm and passion are part of our teams' DNA.*

*We proudly carry the legacy of these 50 years. It allows us more than ever to look to the future with the same determination.*

Alain PETIT

# Une collection de 14 formes d'abat-jour

A collection of 14 lampshades designs

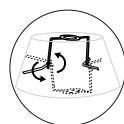

## ABAT-JOUR RÉVERSIBLE REVERSIBLE LAMP SHADES

**Corep offre la possibilité sur certains produits de les utiliser en abat-jour sur un pied de lampe, ou en suspension :**

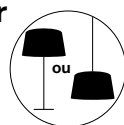

Corep offers the possibility for some products to use them as lampshades on a lamp base or suspended :

**- soit les produits ont une carcasse réversible (cf réf 1242-1246) qu'il faut manipuler très simplement, pour permettre le changement de position. Vous trouverez le picto suivant :**

- either the products have a reversible frame (see ref 1242-1246) which should be handled very simply, to allow the change of position, and you will find the following pictogram :

**- soit les produits ont une forme symétrique qui leur permet en inversant simplement leur sens, d'être utilisés en abat-jour ou suspension, vous trouverez le picto suivant :**

**ex : le cylindre réf 1056-1285-1910.**

- or the products have symmetrical shape that allows them to be used as lampshades or suspended simply by reversing their direction eg: cylinder ref 1056-1285-1910. You will find the following pictogram.

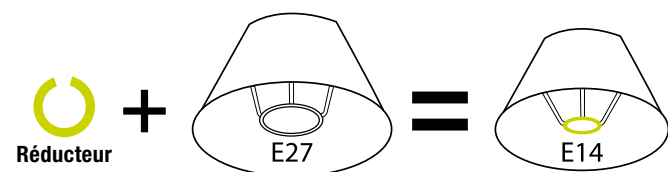

**PENSEZ A VÉRIFIER QUE LA BAGUE DE LA CARCASSE DE VOTRE ABAT-JOUR S'ADAPTE BIEN AUX DIMENSIONS DE LA DOUILLE DU PIED CHOISIE.**

**DANS LE CAS CONTRAIRE COREP VOUS PROPOSE DES RÉDUCTEURS (RÉFÉRENCE 10030)**

**AFIN DE DIMINUER LA BAGUE DE E27 À E14.**

THINK OF CHECKING THAT THE RING OF THE CARCASS OF YOUR LAMP SHADE ADAPTS WELL TO THE DIMENSIONS OF THE CASING OF THE SELECTED FOOT.

IN THE CONTRARY CASE COREP YOU PROPOSE REDUCING (REFERENCE 10030) IN ORDER TO DECREASE THE RING OF E27 WITH E14.

## Température de couleur Colour temperature

**TEMPÉRATURE DE COULEUR : couleur apparente de lumière émise. Elle s'exprime en degrés Kelvin (°K). Elle permet de classer les lampes en lumière chaude <3000°K, lumière intermédiaire : 4000°K et lumière froide > 4000°K.**

COLOUR TEMPERATURE: colour visible in emitted light. This is expressed in degrees Kelvin (°K). It enables lamps to be classified in terms of warm light: <3000°K, intermediate light: 4000°K and cool light: > 4000°K.

Ce pictogramme signifie que l'équipement ne peut être jeté avec les autres déchets, qu'il fait l'objet d'une collecte sélective en vue de sa valorisation, réutilisation ou recyclage. Le montant de l'éco participation est indiqué sur notre tarif.

DEEE - This pictograph means that the fittings can't be dropped together with the other waste, that it is subject to a selective collection so as to be valorised, reused or recycled. The amount of the eco participation is indicated on our tariff.

## L'emballage Packaging

La plupart de nos produits (sauf certains cannages ou produits en métal) sont emballés avec un film thermo-rétractable anti-statique ou boîte couleur qui les protège de la poussière et des marques dues aux manipulations des clients.

The majority of our products (except some cane or metal products) are packaged with a thermo retractable anti static film or color box which protects them against dust and marks which can occur due to customer handling.

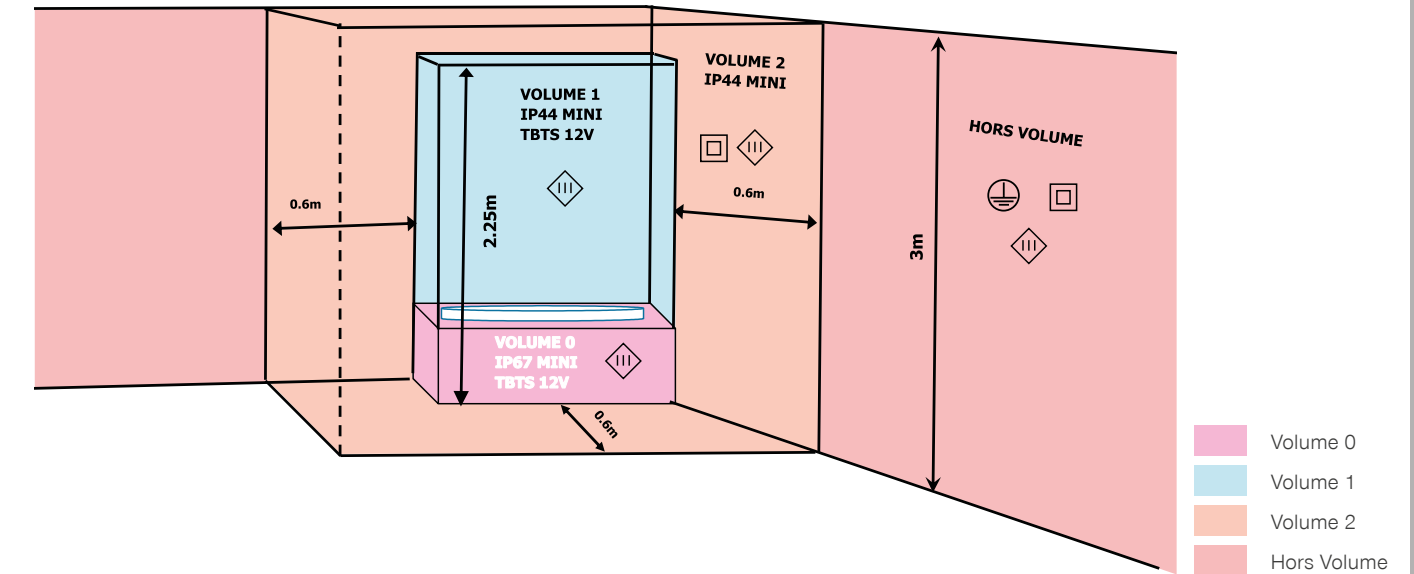

## Normes Standards

Tous nos produits respectent la norme européenne en vigueur pour les Luminaires : **NF-EN60.598-1**  
 Nos produits respectent également les normes **REACH, ROHS, ERP...**  
 Ils respectent également le règlement délégué (UE) N°874/2014 de la commission du 12 juillet 2012, complétant la directive 2010/30/UE du parlement européen et du conseil en ce qui concerne l'étiquetage énergétique des lampes électriques et des luminaires.

All of our products adhere to the current European standard for lighting, NF-EN60.598-1  
 They also meet the REACH, ROHS, ERP... standards.  
 They also comply with the delegated regulation (UE) N°874/2014 from the 12 July 2012, that complete the 2010/30/UE directive from the european parliament and from the council regarding the lightings energy labelling.

## Installation des appareils dans une salle de bain

Fittings of the devices in a bathroom

## Les indices de protection IPxx

Premier chiffre (corps solide) :

IP0 : pas de protection

IP1 : protection contre des corps étrangers solides plus grand que 50 mm

IP2 : protection contre des corps étrangers solides plus grand que 12 mm

IP3 : protection contre des corps étrangers solides plus grand que 2,5 mm

IP4 : protection contre des corps étrangers solides plus grand que 1 mm

IP5 : protection contre les dépôts de poussière

IP6 : protection contre la pénétration de la poussière (étanchéité)

Les indices de protection IPxx

Deuxième chiffre (corps liquide) :

IPx0 : pas de protection

IPx1 : protection contre la chute de gouttes d'eau, l'appareil étant dans sa position normale

IPx2 : protection contre la chute de gouttes d'eau, l'appareil étant incliné de 15° par rapport à sa position normale

IPx3 : protection contre l'eau de pluie, du moment que celle-ci ne fait pas un angle supérieur à 60° avec la verticale

IPx4 : protection contre les éclaboussements et les projections d'eau

IPx5 : protection contre les jets d'eau à la lance

IPx6 : protection contre les paquets d'eau ou les jets puissants

IPx7 : protection contre l'immersion pendant une durée déterminée

IPx8 : protection contre l'immersion permanente.

Ceci signifie par exemple qu'un boîtier IP65 est protégé contre la pénétration de la poussière et qu'il résiste à des projections d'eau à la lance.

## The IPxx protection indices

First figure (solid body):

IP0: no protection

IP1: protection against solid foreign objects larger than 50 mm

IP2: protection against solid foreign objects larger than 12 mm

IP3: protection against solid foreign objects larger than 2.5 mm

IP4: protection against solid foreign objects larger than 1 mm

IP5: protection against deposits of dust

IP6: protection against penetration by dust (sealing)

The IPxx protection indices

Second figure (liquid body):

IPx0: no protection

IPx1: protection against falling drops of water, the appliance being in its normal position

IPx2: protection against falling drops of water, the appliance being tipped at 15° from its normal position

IPx3: protection against rain, as long as it is not at an angle greater than 60° from the vertical

IPx4: protection against splashes and jets of water

IPx5: protection against high-pressure water jets

IPx6: protection against larger quantities of water and powerful jets

IPx7: protection against immersion for a specified period

IPx8: protection against permanent immersion

This means for example that a IP65 unit is protected against penetration of dust and that it resists water splashes and a high-pressure water.
